## 3 Choose the best tint for your bathroom...

Clear Tint

Fresh and vibrant - This tint has a hint of green which is accentuated by the texture of the glass and allows maximum light transmission.

Low-Iron Tint

Contemporary elegance - Low-iron tint has a crystal like appearance while providing maximum light transmission. This tint will complement any colour scheme.

Grey Tint

Modern Decadence - This tint looks darker in certain environments so can provide more obscurity if required.

Bronze Tint

Boutique Luxury - Bronze tint creates the feel of a hotel bathroom and adds warmth and style to your interior. Great for complementing limestone and natural stone tiles.

Blue Tint

Coastal chic - Blue tint brings to mind summer by the sea, a beautiful tint you will never tire of.
